

FUTURE CASTING WORKSHEET

Terms:

| | |
|--|---|
| Future Casting  | A timeline that looks years into the future to solve a problem that is imminent, at least according to the tea leaves of trends and R&D pipelines. |
| Foresight  | The ability or action of predicting what will happen or what is needed for the future using your own experience, background and insights |
| Domain  | Your field of play, area of expertise, where you do your work (e.g. education, healthcare, environment, etc...) |
| Signal  | Early indicators of things to come; Before a trend becomes a trend; something you “notice” |
| Driving Force  | The force or “thing” that is creating a need for the signal you identified |

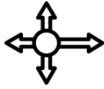

ACTIVITY: Identifying signals

Using foresight, take a moment to reflect on the signals you “see” or feel that are relevant to your domain. Nothing is off the table. Write these below:

Conversation prompts:

What is grabbing your attention about this signal? What is being disrupted, as you see it? What are the innovations you see as a result of this disruption?

ACTIVITY: Driving Forces

Write down the signal you want to learn more about:

After looking online or asking ChatGPT for help – what did you learn that is relevant to you and your domain? (write you highlights below)

After your discussion, what additional question do you have about the driving forces and signals that would help you determine you should take this signal seriously? Please write below

Bonus Questions to be explored:

Is there any possibility that you can influence or change a driving force to move in your favor? How? Why you?

As you consider the insights and ideas from this work, does it make sense to collaborate or partner with others to create an advantage for you, your organization and the sector?
